Lab Work

Chapter - 6

Abstraction

Lab Work #6.1

Sr. No.	Question
Q.1	Write a Program to abstract some attributes of class Admin to prevent them from being inherited by its child classes. - Class Admin -> Class Manager - Class Manager -> Class Employee - Class Admin has the following members: company_name manager_salary employee_salary total_staff total_annual_revenue can_terminate - use all attributes accessibility in the parent class and child class properly. - override myAccess() in both child classes to display all parent class members' values accordingly.
